Languages and FrameWorks: React.JS,Next.Js,Javascript,Bootstrap,HTML,CSS
Other Tools: Github,ChatGpt,Figma,Canva,VSCode
Other Skills: UI/UX,Responsive Design,Graphic Design,SEO

Experience/Projects

GirlScript Summer of Code   1stOct 2024 – 31thOct 2024
Open Source Contributor   *Remote*

- As a selected contributor in the GirlScript Summer of Code 2024 - Extended Edition, I embraced open-source development for the first time. **This experience allowed me to work with real-world projects and engage in collaborative coding.**
- I contributed by **raising 23 issues, with 11 assigned to me, and created multiple pull requests, a couple of which were successfully merged**. This hands-on experience sharpened my skills in problem-solving and version control.
- **Using GitHub Desktop, I managed my contributions** effectively and responded to feedback. I learned the importance of updating code branches and making improvements through additional pull requests.
- Collaboration in GSSoC taught me effective communication in a team-oriented coding environment. **I gained practical insights into maintaining clean, organized code for broader project usability.**
- Overall, this opportunity strengthened my technical skills and deepened my passion for open-source contributions. I'm eager to **apply these lessons in future projects** and community-driven development.

Self Employed   May 2023 – July 2023
Web Developer   *Remote*

- For three months, I worked as a self-employed web developer, **creating a multi-page yoga website for a client with smooth animations and interactive features.** I integrated email and chat options to enhance user engagement, tailoring each element to meet the client's needs.
- In addition to this project, I contributed to smaller projects by developing specific code components. **These experiences allowed me to sharpen my skills** in targeted coding and front-end development.
- This role taught **me how to manage client expectations, meet deadlines**, and deliver high-quality websites. My self-driven projects honed my adaptability and strengthened my technical problem-solving skills.
- Working independently deepened my understanding of user-centered design and coding best practices. **I'm enthusiastic about applying these skills to future projects** where creativity and precision are key.

Personal Projects

- **Weather Api Website :-** Built a responsive Weather API website displaying real-time weather updates for global locations, with a user-friendly interface and dynamic data fetching. Designed to enhance accessibility and provide quick, accurate weather details. View the project on GitHub or live here.
- **Yoga Website:-** Developed a multi-page yoga website with smooth animations and interactive features for a client, designed to enhance user engagement. Includes integrated email and chat options for streamlined communication. View the project live here.
- **Personal Website:-** Created a personal portfolio website to showcase my projects and skills in an interactive, visually appealing format. Designed for easy navigation and a seamless user experience. View it on GitHub or live here.

Awards & Achievements

- **Silver medal** in the **State Badminton** Championship
- **Gold medal** in the **District Badminton** Championship.

Education

Glocal University   Sept 2022 – Aug 2025
Bachelor of Computer Applications   *Saharanpur, Uttar Pradesh*
